## Objectives:

Actively seeking a role in an innovative software company, I bring extensive expertise in software development, including skills in development, deployment, unit testing, and client collaboration. With strong communication skills and technical knowledge, I aim to contribute to cutting-edge projects while working collaboratively with a diverse and talented team.

## Experience:

### **Senior Software Engineer at MTBC (CareCloud) in Islamabad (10/2022 – Present)**

During my tenure as a Software Engineer at MTBC's CareCloud division in Islamabad, I undertook a diverse range of responsibilities within the realm of software development. These tasks encompassed coding, unit testing, deploying solutions, and third-party integrations, such as payment methods, Active Report, Sage, AWS S3, SharePoint, among others. I played a pivotal role in the design and implementation of software solutions. Leveraging my expertise in AWS, Microsoft Azure, and Azure Pipelines, I contributed significantly to the deployment process. Additionally, I utilized SonarQube for continuous inspection of code quality to ensure maintainability and reliability of the software.

### **Web Developer at Ark IT in Islamabad (10/2021 - 5/2022)**

I held this position as a Web Developer at Ark IT in Islamabad for nearly one years. This role involved the development of web-based applications, websites, and other online solutions. Responsibilities included coding, testing, and maintaining web applications, collaborating with clients to understand their requirements, and ensuring the delivery of high-quality web solutions.

### **Web Developer at Fiverr (09/2018 – 08/2021)**

In my capacity as a Web Developer on Fiverr, dedicated to freelance web development, I extended my services to clients on the Fiverr platform. This role provided a platform for me to work on a diverse range of projects, highlighting my adaptability in web development. Notably, I excelled in implementing third-party authentication, integrating solutions such as SharePoint and Sage, and overseeing deployment on IIS. Additionally, I specialized in handling web API-based projects, further showcasing my expertise in creating dynamic and interconnected web applications. This comprehensive experience allowed me to demonstrate proficiency across various facets of web development.

## Skills:

- **Web Development:** Asp.net MVC and Dot net Core (3.1,6.0,7.0,8.0)
- **Front End:** Html/ css, js, jquery
- **Security:** Microsoft Identity using Entity Framework
- **Web API:** Asp.net and Dot net Core (3.1,6.0,7.0,8.0)
- **Backend:** c#
- **Database:** SQL, MySQL, postgree SQL (function, Store Procedure)
- **Deployment:** Asp.net and Dot net Core, etc.
- **Server:** Azure, GoDaddy, IIS etc.
- **App Development:** React Native
- **Cloud Platform:** Azure, AWS
- **GitHub:** Release Isolation Model
- **Jira**
- **SonarQube**
- **Unit Testing**

## Qualification:

- **Bachelor in Computer Science(2018 - 2022)**  
PMAS Arid University Rawalpindi
- **Intermediate in ICS(2015 - 2017)**  
Allian high school& college Pattika Muzaffarabad
- **Matriculation in Medical Science(2013 - 2015)**  
Allian high school& college Pattika Muzaffarabad

## Other Qualification:

- **TEVTA:** Microsoft office, Adobe illustrator, Adobe photoshop
- **DigiSkills:** Freelancing & WordPress

## Projects:

- **CTW (FIA)**  
The acronym "CTW" and "FIA" suggest a project related to the Federal Investigation Agency. Without specific details, it's challenging to provide a detailed explanation. However, this project might involve developing a web-based system or portal for the FIA, possibly focusing on case tracking, information management, or other functionalities specific to the agency's needs.
- **Invoice Management System (Freelance Project)**  
An Invoice Management System is a web application designed to streamline and automate the process of creating, managing, and tracking invoices. This system likely includes features such as generating invoices, recording payments, managing client information, and providing reporting capabilities. The goal is to enhance efficiency and accuracy in the invoicing process.
- **Expense Vendor Management (Freelance Project)**  
A web application meticulously designed for optimizing and automating payment workflows, the Expense Vendor Management System encompasses crucial features such as the initiation of payments, approval of transactions, and seamless integration with third-party platforms – such as document uploads on SharePoint. The overarching goal of this system is to enhance efficiency and accuracy throughout the payment management process.
- **Airport Taxi Booking (Freelance Project)**  
This project likely involves the development of a web-based platform for booking airport taxi services. Users can access the system to reserve a taxi for transportation to or from the airport.

The system may include features such as user registration, rout selection, fare calculation, and real-time tracking. The aim is to provide a convenient and efficient way for travelers to book and manage taxi services related to airport transportation.

➤ **Complain Registration Portal (Study Project)**

A Complaint Registration Portal is a web application designed to facilitate the submission and tracking of complaints. Users can access the portal to register their complaints, provide relevant details, and track the status of their complaints. The system may include features for administrators to manage and resolve complaints efficiently. This type of portal is commonly used by organizations and government agencies to enhance transparency and address user concerns effectively.
